**Empower Your Edge:**  
Local Data Center, Global Platform

## Enable New Levels of Service Performance

EdgeConneX's purpose-built, edge-of-Network facilities enable the fastest delivery of bandwidth-intensive, latency sensitive Content and Cloud applications to local consumers and enterprises.

We are creating a new edge of the Network by designing and deploying Edge Data Centers<sup>®</sup> (EDC) that are strategically positioned nearest to Network provider aggregation points, establishing new local peering facilities to ensure the most efficient, lowest latency placement of our Customers' content and applications, improved quality of service, and increased security.

Our creative approach facilitates innovative distribution models that support your needs at the Edge of the Network. This is the reason that the world's leading and most influential ILEC, Cloud, Content, Network, Wireless, and Enterprise companies trust EdgeConneX to deliver their data.

EdgeConneX's Sofia Edge Data Center<sup>®</sup> offers a carrier-neutral network connectivity platform for Cloud, Content, Network and IT providers to deploy their infrastructure in close proximity to their Customers in the Balkans, Eastern Europe and Turkey - ensuring optimal performance, security, availability and economics for their services.
