

Cloud Solutions With Rackspace

EdgeConneX delivers purpose-built data centers globally to bring your business close to your customers and the Cloud. Now, Rackspace brings the power of its Fanatical Experience to optimize your Cloud migration .

With over 40 data centers in more than 30 markets worldwide, EdgeConneX helps Cloud providers reach more customers in more places. For enterprises, EdgeConneX offers cloud on-ramp services to all major Cloud providers, delivering faster, more secure access to Cloud assets and resources.

Rackspace and EdgeConneX are teaming up to offer a complete set of Cloud solutions, giving enterprises choice in how they want to deploy their own Cloud strategies, backed by unparalleled expertise, reach, and service.

Rackspace is the partner of choice in a world of ever-changing IT, delivering certified expertise and integrated managed services for hybrid and private clouds, managed hosting, and enterprise applications. Proven expertise with leading technology providers, including Alibaba, AWS, Google, Microsoft, OpenStack, Oracle, SAP, and more, makes Rackspace uniquely positioned to provide unbiased advice on the technologies that will best serve each customer's specific needs.

The combined resources of EdgeConneX and Rackspace will help you Empower Your Edge and optimize your cloud migration experience.

Solutions

EdgeConneX and Rackspace customers can realize immediate benefits including:

- **EdgeConneX Data Center Services:** An established global platform of hyperlocal to hyperscale facilities in over 30 markets worldwide, connects Cloud Service Providers and enterprises with improved latency, performance and reliability
- **Hybrid & Multi-Cloud Scalability:** Hybrid and Multi-Cloud solutions allow customers to optimize Cloud services, delivering flexibility and scalability as their business grows and evolves. Cloud connect solutions from AWS, Megaport, Telia, PacketFabric, Comcast, and more, allow customers to utilize the best, fastest cloud service for any workload.
- **Private Cloud Services:** Pay-As-You-Go Private Cloud services from Rackspace allow customers to run private clouds with a consumption and billing model similar to public cloud models.
- **Managed Hosting, Data and Applications:** Rackspace offers managed services for leading databases, ecommerce, digital marketing and enterprise applications in the Oracle and SAP ecosystems.
- **24x7 Visibility and Enhanced Security:** The powerful combination of Rackspace Managed Security (RMS) and EdgeConneX EdgeOS, the next-generation DCIM platform, delivers added value for customers with industry-leading security and web-based, self-service data center operations, monitoring, ticketing, and more.

BENEFITS

SCALE:

- Over 40 data centers in more than 30 markets worldwide
- Tier-3 data centers from 2MW to 60MW
- High power-density up to 30+ kW per rack
- Global footprint

SPEED:

- Colocation services
- Powered shell sites available
- Campus expansion in select markets
- Build-to-Suit data centers for capacity where you need it

Fanatical Experience™

Experts on your side, doing what it takes to get the job done right. From first consultation to daily operations, Rackspace combines the power of always-on service with best-in-class tools and automation to deliver technology when and how you need it.

EdgeConneX Data Centers

Services

Every data center is unique, but many of our services are available in any EdgeConneX data center worldwide:

Security

- Physical security multi-stage containment areas with PIN and live video authentication
- 24x7 color CCTV and video surveillance with >90-day online video storage
- NOC services
- 24x7 staffing availab
- Additional security available to meet and exceed your business requirements

Connectivity

- Diverse network resources available for hyperscale requirements

Location Planning

- Real estate services to identify the right location for your data center, network, and power needs
- Construction and local rules compliance to ensure on-time, on-budget, no-hassle builds and deliveries for build to suit

EdgeOS

- Our industry-leading DCIM+ application
- Video monitoring, work requests and tickets, status monitoring on over 500,000 data points, all via a single pane of glass
- EdgeOS is available in all EdgeConneX data centers, so you can manage all of your sites and assets from one web-based application

EdgeConneX Benefits

Capacity

State of the art data center with the flexibility to support deployments ranging from a single rack, to a large custom cage or pod, all the way to a build to suit data center any of which can further scale to meet future needs for growth.

Connectivity

EdgeConneX data centers feature many leading NSP's and MSO's deployed and available for interconnection in our carrier-neutral facilities.

Capability

Purpose-built Tier-3 designed facilities with superior operating reliability, high-density power, and carrier-neutral support to satisfy any customer's demands, including HPC solutions.

Cloud

Multi-Cloud access solutions for enterprises may be supported locally through our technology and solution partners meaning customers can locally access leading CSP's directly from many of our Data Centers

Cooling

The facility has robust, redundant power and cooling to support any application, including AI and Deep Learning platforms. Temperature and humidity are monitored, controlled and managed to industry standards.

Customer Experience

We aim to deliver a premium customer experience and proximate data center solutions, allowing you to deliver a premium experience to your own customers anywhere.

Compliance

Our facilities are SOC2 Type 2, PCI DSS and HIPAA compliant.

Partners

Our world-class partners, including Rackspace, help deliver the combination of solutions your business needs.
