

Market Overview

The EdgeConneX facilities in the Tel Aviv metro area serve a fast growing market for data center solutions in one of the most innovative technology centers in the world. Our Tel Aviv data centers also serve as a gateway for global cloud and cloud-based services expanding into the Middle East region. These facilities offer extensive fiber and peering options with resilient access to local and international Internet service providers, offering connectivity to global markets and services.

Tel Aviv is home to a thriving startup culture, with an array of cybersecurity, software, and related tech firms and considerable local research and development. These industries combined with a tech-savvy local and federal government provide a variety of immediate clients, many of whom are already cloud-enabled. Nearby cable landing stations in Haifa and Tirat Carmel offer the option to connect directly to areas across the Mediterranean.

EdgeConneX Benefits

Capability

State of the art data centers with the flexibility to support deployments ranging from a single rack, to large custom cages or pods, all the way to build to suit data centers any of which can further scale to meet future needs for growth.

Connectivity

Many leading NSP's and MSO's are deployed in our Tel Aviv Data Centers and available for interconnection.

Capability

Purpose-built Tier-3 designed facilities with superior operating reliability, high-density power, and carrier-neutral support to satisfy any customers challenges and demands.

Cloud

Multi-Cloud access solutions for enterprises may be supported locally through our technology and solution partners meaning customers can locally access leading CSP's directly from our Tel Aviv Data Centers.

Customer Experience

We aim to deliver a premium customer experience and proximate data center solutions, allowing you to deliver a premium experience to your own customers.

Partners

Our world-class partners help EdgeConneX deliver the combination of solutions your business needs.

Technical Specifications & Configuration

Cooling

The facility has robust and redundant power and cooling to support any application. Temperature and humidity is monitored, controlled and managed to industry standards.

30 inch raised/under floor forced air plenum

N+1 CRACs located in separate suites, maximizing customer-designated areas

Network

Building POEs are diverse, with a variety of fiber conduits to physically diverse MMR's

Herzliya Networks: Cellcom, Bezeq, HOT/Altice, Partner Communication

Security

Multi-stage security containment systems that use PIN and live video authentication

Mantraps and strictly enforced protocols regarding entry access

24/7 Color CCTV/video surveillance and >90-day online video storage

Interior managed security zones

National network operations center for security management

24/7 NOC services

Fire Suppression

Pre-action, zoned dry-pipe sprinkler systems with zoned maintenance aisles and separate suites

Optional Services

Remote hands services for break fixes, configuration, and troubleshooting

EdgeConneX Services: design, build, implement and maintain your equipment infrastructure

EdgeOS, our next generation data center operating system provides real-time visibility, including ticketing and SLA management for all EDC locations

Standards and Certifications

Our facilities are SOC2 Type 14, ISO 27001, PCI DSS and HIPAA compliant.
